

Linux Lab Unit 2

Christian Kniep

Internation Center of Applied Technologies Bandung

4. August 2010

Table of content

- 1 Handle the output
 - stdout,stderr

output, pipes

- if you fire a command the output will go through the Terminal
- dump it
 - ▶ a new file `ls -l >list`
 - ▶ append it to a file `ls -l >>list`
- if you want to process it, pipe it in another process `ls -l |`
 - ▶ search for line with pattern `ls -l |grep pattern`
 - ▶ the first two lines of the output `ls -l |head -n2`
 - ▶ the last two lines of the output
 - ▶ `ls -l |tail -n2`

environment

- Where are all the commands located?
 - ⇒ depends :) Mostly `/bin`, `/usr/bin`, `/usr/local/bin`
 - But how does Linux know where to look?
 - ⇒ Environment. Try `echo $PATH`
